

Fast track flooring solutions for healthcare

The experts in fixing flooring for healthcare

ARDEX products have been successfully specified on hundreds of flooring installations within the healthcare sector, including Great Ormond Street Children's Hospital, and the new £30 million Institute of Transplantation at the Freeman Hospital, Newcastle.

ARDEX have developed a system of products specifically designed for fast track flooring installations, that minimise downtime and disruption and ensure a perfect finish every time.

ARDEX products, incorporating the unique 'RAPIDRY FORMULA' technology, have controlled drying and hardening properties, allowing the product to be walked on, and the installation of the final floorcovering to be completed, in the shortest possible time.

SPECIFICATION SUPPORT AT EVERY STAGE

When specifying ARDEX you can rely on our expert team for on-going support at every stage of the process, from rapid response to specification writing, to installation visits and on-site testing. British Standard clauses provide best practice,

guidance and support for your flooring specification, and we regularly partner with complementary product manufacturers to provide project warranties.

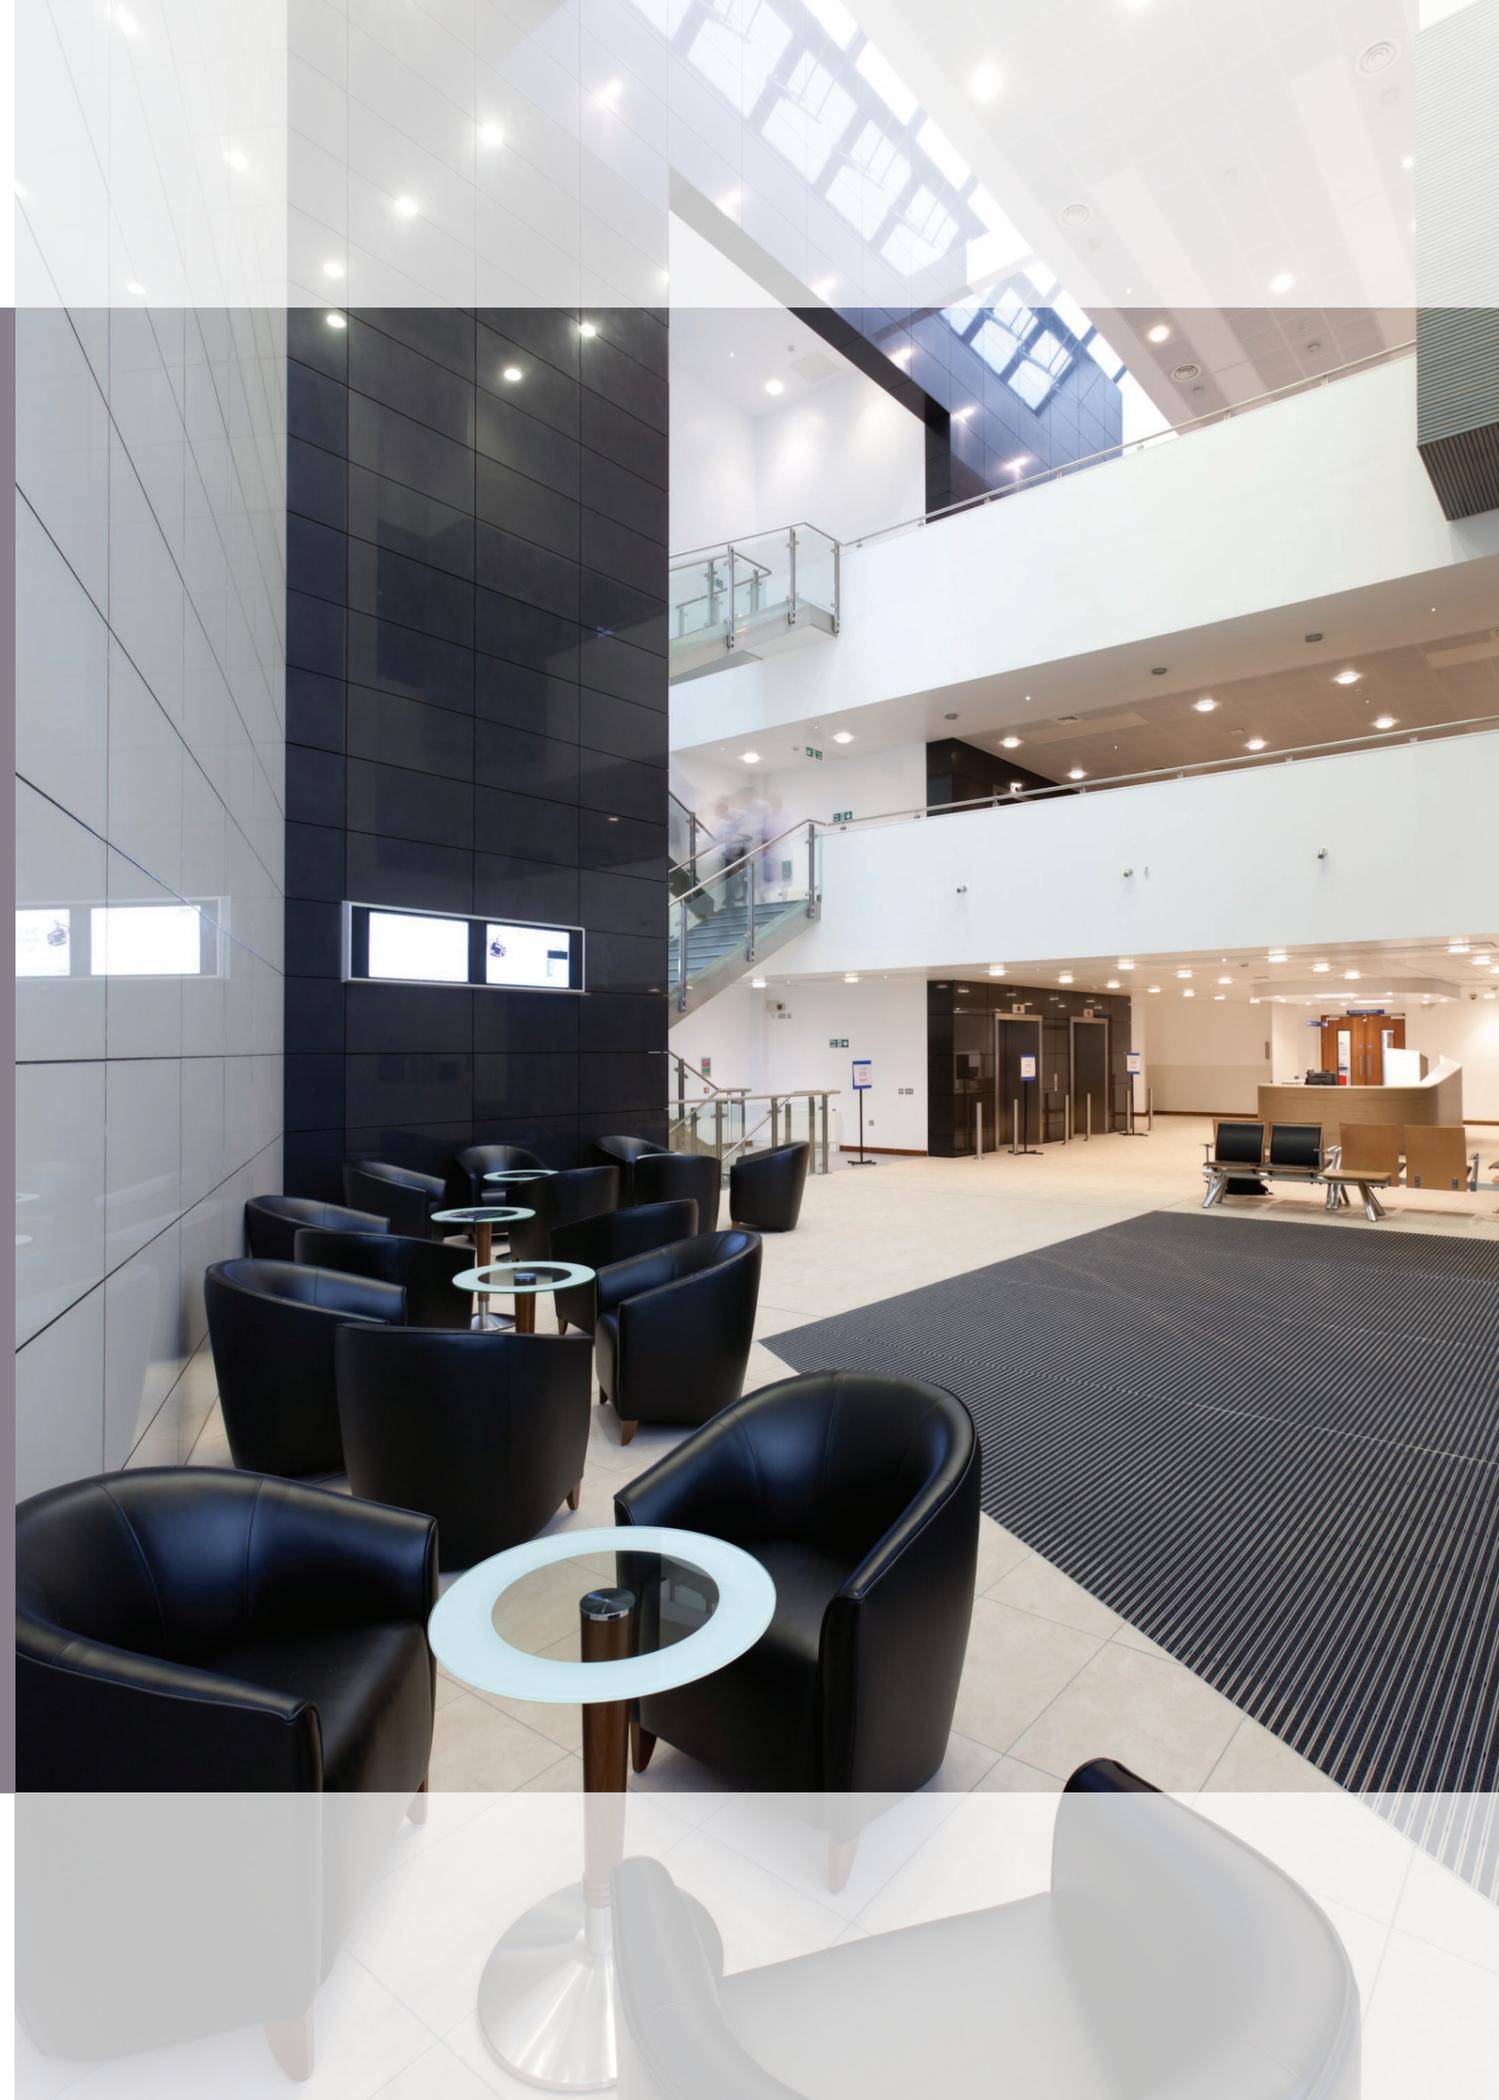

Our purpose-built training facility enables us to bring all parties involved in an ARDEX specification together, from the client through to the main or sub-contractors, ensuring total confidence in the specification and subsequent on-site application.

ADREX CPD ACADEMY

The Academy allows you to earn CPD points by taking one of our RIBA approved CPD seminars online, including 'Screeding, Levelling & Sub-floor Preparation'. Technical guidance, product information and project case studies are also available to download, making the ARDEX CPD ACADEMY an essential tool in the specification process.

For the latest and most up to date information and advice, you can visit the ARDEX CPD ACADEMY at:

Prescribing the perfect system solution

ARDEX prepared the ideal system solution for a refurbishment to the North Manchester General Hospital Accident & Emergency Department.

To commence the 1800m² project, ARDEX DPM 1 C, a damp proof membrane, was applied to the power floated concrete sub-floor. The application of an ARDEX Damp Proof Membrane ensured that the floor could be levelled within hours, guaranteeing the early laying of the final floorcovering.

Following the application of ARDEX P 82 Primer to the cured ARDEX Damp Proof Membrane, ARDEX K 11 Rapid Hardening Levelling and Smoothing Compound was applied to provide a smooth and flat surface for the final floorcovering. ARDEX K 11 is a cost effective solution for levelling sub-floors, and is hard enough to

walk on after only 2 ½ hours, regardless of thickness, and the final floorcovering can be installed the next day.

For the final stage of the flooring installation ARDEX AF 100 Pressure Sensitive Acrylic Flooring Adhesive was used to install the vinyl floorcoverings. ARDEX AF 100 is ideal for securing PVC sheet and luxury vinyl tile floorcoverings, and reduces trowel serration and shadowing.

The flooring contractor commented "It was essential that we provided a cost efficient, fast track solution for this refurbishment project, and by using a system solution from ARDEX, we had peace of mind from start to finish."

ARDEX have been involved in hundreds of successful healthcare flooring installations, offering fast track solutions which ensured minimal disruption to busy and sensitive working environments.

High performance fast-track flooring solutions

ARDEX provide fast-track flooring solutions that are ideal for areas such as receptions, foyers, wards, corridors, patient treatment rooms, bathrooms and catering areas.

With a specialist range of rapid drying products, you can trust ARDEX to have your floor back in use in the shortest time possible. In line with HTM 61, the ARDEX sub-floor

system guarantees a smooth, crack-free and stable finish suitable for any final floorcovering, and ARDEX products do not promote the growth of bacteria.

With RAPIDRY products from ARDEX, a typical flooring refurbishment can be completed in as little as 6 hours, minimising downtime and inconvenience to the patients and hospital staff.

The ARDEX fast-track flooring system

Where required, replace the existing failed screed with ARDEX A 35 Rapid Setting and Drying Cement for Floor Screeds

ARDEX A 35 - Rapid Setting and Drying Cement for Floor Screeds

Walkable in 3 hours, can receive resilient floorcoverings after only 24 hours, regardless of thickness. When smoothed with ARDEX A 55 smoothing and levelling compound, floorcoverings can be installed after as little as 4 hours.

Smooth and level with ARDEX A 55.

ARDEX A 55 - Ultra Rapid Hardening and Drying Smoothing and Levelling Compound

Ultra rapid drying levelling compound that is ready to receive floorcoverings after as little as 60 minutes, making it ideal for rapid repair and renovation work.

Install the final floorcovering.

ARDEX AF 100 - Pressure Sensitive Solvent-Free Acrylic Flooring Adhesive

A pressure sensitive floorcovering adhesive that reduces trowel serration showing through thin vinyl flooring.

Expert products for healthcare flooring

ARDEX are the experts in sub-floor preparation, and work to the guidelines set by the Department of Health, and the British Standards BS 8203 and BS 8204. Within the healthcare sector it is important that the sub-floor preparation products are designed for the job in hand. ARDEX offer a complete system solution for the flooring installations, including screeds, repair mortars, smoothing and levelling compounds, vinyl floorcovering adhesives and silicone sealants.

Fast-Track Screeds

Traditional sand/cement screeds can take months to dry, but ARDEX screeds can receive floorcoverings after only 4 hours, regardless of thickness.

ARDEX A 38 - Rapid Hardening and Drying Cement for Floor Screeds

Walkable in 3 hours, ARDEX A 38 can receive ceramic tiles directly after only 4 hours, for bonded, unbonded and floating screeds.

ARDEX A 35 - Rapid Setting and Drying Cement for Floor Screeds

Walkable in 3 hours, ARDEX A 35 can receive resilient floorcoverings after only 24 hours, regardless of thickness. When smoothed with ARDEX A 55 smoothing and levelling compound, floorcoverings can be installed after as little as 4 hours.

Damp Proof Membranes

ARDEX Damp Proof Membranes guarantee the early laying of all floorcoverings.

ARDEX DPM 1 C - One Coat Surface Damp Proof Membrane and Residual Moisture Suppressant

Protects the final floorcovering from residual construction moisture and rising damp. ARDEX DPM 1 C can be applied where a structural damp proof membrane is not present or is ineffective.

Rapid Repair Products

ARDEX rapid repair products enable fast track repairs to be carried out to internal and external areas.

ARDEX ARDURAPID A 45 - Rapid Drying and Hardening Internal Repair Mortar

Ideal for the rapid repair of small internal areas, ARDEX ARDURAPID A 45 can receive floor finishes in as little as 90 minutes.

ARDEX EP 2000 - Solvent-free, Low Viscosity, Two-component Epoxy Resin

ARDEX EP 2000 fills cracks in screeds and concrete, and is ideal for priming sub-floors with unstable surfaces. With a high inherent strength EP 2000 can receive loads after 24 hours.

ARDEX PSRS - Penetrating Screed Renovation System

ARDEX PSRS penetrates into damaged screeds, filling voids to strengthen and restore poorly compacted and low strength screeds.

Levelling & Smoothing Compounds

A smooth, level base is essential in achieving a perfect flat finish for the final floorcovering, and ARDEX levelling and smoothing compounds are an ideal, cost effective way to achieve this. For larger projects, many compounds can be pumped at a rate of 300-400m² per hour.

ARDEX A 55 - Ultra Rapid Hardening and Drying Smoothing and Levelling Compound

Ultra rapid drying levelling compound that is ready to receive floorcoverings after as little as 60 minutes, making it ideal for rapid repair and renovation work.

ARDEX NA - Ultra Rapid Setting Latex Sub-Floor Levelling and Smoothing Compound

The ideal product for any refurbishment, can be used with confidence over old adhesive residues, including bitumen, and even direct to ceramic tiling, no priming required.

ARDEX K 11 - Rapid Hardening Levelling and Smoothing Compound

Excellent surface finish and can be walked on in only 2 1/2 hours regardless of thickness. Ready to receive floorcoverings the next day.

Vinyl Floorcovering Adhesives

ARDEX manufacture a range of adhesives suitable for all floorcovering types.

ARDEX AF 100 - Pressure Sensitive Solvent-Free Acrylic Flooring Adhesive

A pressure sensitive floorcovering adhesive that reduces trowel serration showing through thin vinyl flooring.

Silicones

ARDEX have developed a range of silicones for sealing wall and floor joints.

ARDEX ST - Elastic Silicone Sealant

An interior and exterior grade silicone, containing fungicides to combat mould growth. Available in 6 colours and transparent.
